Scott Free Don't the Greens in Georgia need to form a new Green Party , and then have them recognized by the National, and let this old GP group go away? Being transphobic is not something the Greens want to be associated with. It would be the death of the Green Party.

Mike Gamms for NY Unfortunately there a several members of this party who are as complicit in the death of the green party as they are in the death of trans people. The longer they sit on the fence, the more damaging it is to both the trans community and the party. we are being as patient as we can with these people, but is reaching a point where their inaction will be their downfall, and the potentially downfall of this party. it's basically 6-7 trolls, part of an organized transphobic hate mob, that need to be banned from this group and the georgia party excommunicated and disavowed just like we would do if the KKK tried to over run the green party. This transphobic hate mob is organized and manipulative with language, and have a begun a coup of the green party starting at the state party in GA, with the goal of erradicating trans people. They target and attack and bully state and national co-chairs with manipulative language and harassment campaigns, and tragically some of these co-chairs have decided to either succumb to the bullying of a hate mob, or just freeze up and do NOTHING, which in effect is the same thing. but we will not sit idly by while transphobic hate mob advocates for genocide, and we will not sit idly by while high ranking party members do nothing. The world is watching. Watching these bigots, and watching the fence riders who do nothing to stop it.

Mike Gamms for NY Yes it's very bad. One of my would be top advisors in my congressional campaign is non binary and is very hesitant to accept the position now because of the

Mike Gamms for NY Yes it's very bad. One of my would be top advisors in my congressional campaign is non binary and is very hesitant to accept the position now because of the green party's response, and is starting to believe the GP as whole is an enemy of trans people not an ally, and it's taken alot of work to convince them otherwise.. They were appauled by this facebook group. Honestly among the biggest failure of the Green Party has been the GPUS National Media Committee who moderate this group and have completely dropped the ball. I am not at the point of naming names yet, but several members of the committee are absolutely on our side and have the queer community's back in ridding the party of bigotry and protecting the queer greens who defend our community, but clearly it is not a consensus as it has been 3 weeks and this transphobic hate mob is still allowed to flood this group with hate speech and bigotry wrapped with manipulative language. I was informed by GPUS National Communication Director [Michael O'Neil](#), to report all transphobic, bigoted activity in this group and it would be taken care of, in a conference call about this issue with the several county, state, and national chairs this past Sunday, but the response has left alot to be desired. Some comments are removed but not all, and the small group of bigots have not been banned and continue to troll every post, even ones not related to this issue. Every day that the GPUS and the National Media Committee fail to take action to defend the trans community, more harm is done to trans people, the green party, and every one running for office or in this party. Pretty soon we will be forced to call for those who have not taken action to resign from their positions of leadership, as they have failed in their moral and ethicall duty and are allowing marginalized communities to be viciously attacked by the bigots trying to take over this party.
